INDEX TO VOLUME 41

ARTICLES

Alumni Opinions on College General-Education Science, Thomas P. Fraser and John W. King, 11–14.

American Doctoral Dissertations on Science Written by Women in the Nineteenth Century, Walter Crosby Eells, 415–417.

Association for the Education of Teachers in Science, Lawrence Pugno, 327–331.

Benjamin Charles Gruenberg, Clarence M. Pruitt, 175–180.

Biology in General Education, A Few Issues Concerning, Murl C. Shawver, 219–223.

Can Human Relations Problems Be Solved Scientifically?, Frank E. Wolf, 431–432.

Case of the Unappreciated Science Book, The, Marguerite P. Archer, 431–436.

Chemistry and Physics Enrollment in Tennessee High Schools, 1954–55, Will S. DeLoach, 197–199.

Charles John Pieper, Clarence M. Pruitt, 87–91.

Children—Creative Explorers, Katherine E. Hill, 268–269.

Civil Defense Orientation in a Broadening Curriculum, E. M. Gleason, 428–431.

Comparison of the Effectiveness of Courses at Three Levels of Instruction in Developing Understandings of Principles of Physics, Harold E. Wise, 418–424.

Critical Shortage of Science Teachers, A, Edward K. Weaver, 145–150.

Criticisms of Education, Max Marshall, 154–160.

Current Trends in Conservation Education, Elizabeth Hone, 218.

Developing a Science Program for Rapid Learners, A. Harry Passow, 104–112.

Dinosaurs—Then There Were None, Mervin E. Oakes, 298–300.

Educational Psychology for the Blind, Arthur H. Bryan, 14–26.

Einstein's Fourth Dimension Really the Fourth, Is?, Kenneth Walters, 216–217.

Elementary Science, Background for Today's World, Donald G. Decker, 292–297.

Erupting Volcano, An, Annie J. Colbert, 331–334.

Examination of Scientific Method and Attitude, An, Clarence H. Boeck, 92–95.

Explanations by College Students, Mervin E. Oakes, 425–428.

Fifth Annual Review of Research in Science Teaching, Ellsworth S. Obourn, Lillian H. Darnell, George Davis, and Edward K. Weaver, 375–409.

Financial Report of NARST, Clarence M. Pruitt, 82.

Florida Science Forecast for 1956, Robert D. MacCurdy, 235–237.

Francis Day Curtis, Clarence M. Pruitt, 371–374.

General Chemistry, A Case for, Cyril C. O'Brien, 227–229.

General Science for the Blind, Arthur H. Bryan, 26–30.

General Science Learning of Eighty-Two Selected Students in Negro High Schools of Louisiana, A Study of, Rogers E. Randall, 61–63.

Gertrude Marian Young, Clarence M. Pruitt, 307–308.

Girl Scouts of America Need Nature Counselors, 234.

Herbert Clark Hubler, Clarence M. Pruitt, 290–291.

History and Philosophy of Science: A Challenge to Higher Education, The, R. H. Simmons, 57–61.

Human Anatomy at the Two- and Four-Year College Levels, A Critique on Teaching, M. M. Shrewsbury and P. J. Freeman, 224–227.

Implications for American Education of the Satellite Proposed in Ike's Speech of July 29, 1955, What Are the, John S. Santosuosso, 48–54.

Is H_2O the Answer to the "H" Bomb?, Charles Wilford Johnson, 40–48.

John Clarence Wells, Clarence M. Pruitt, 321–322.

Making the Most of Demonstrations in Elementary Science, Evan C. Richardson, 304–306.

Meaning of Tests of Significance, The, Peter Timothy Hountras, 210–212.

Minutes on Annual Business Meeting NCES, March 18, 1956, Julian Greenlee, 310–312.

National Council for Elementary Science, 308–309; 312–313; 318–320.

Needed Research in Science Education, Hubert M. Evans, 412–414.

New Look at the Life of Louis Pasteur, A, Lieutenant Charles Bryan, 30–38.

Notes on NCES Group Meetings, Bonnie Howard, 314–317.

Official Minutes of the Twenty-Ninth Annual Meeting of the National Association for Research in Science Teaching, Clarence M. Pruitt, 81–82.

Ooh! Worms!, Doris L. Hawse, 436–439.

Performance of One-Hundred and Forty-Five Selected College Freshmen on the National Achievement Standardized General Science Test, A Study of, Rogers E. Randall, 63–65.

Pot Calls the Kettle Black, The, Clarence M. Pruitt, 167–170.

Principles of Science: A Look Ahead, Waldo W. E. Blanchet, 1–9.

Program of the National Association for Research in Science Teaching, 79–81.

Reading Problem in College Science Instruction, The, Kenneth B. M. Crooks and Charles H. Smith, 54–57.

Report of the Thirty-Seventh Annual Meeting of the Association for the Education of Teachers in Science, Willard J. Jacobson and Lawrence Pugno, 322–336.

Report on the First Meeting of the Joint AIP—AAPT—NSTA Committee on Teaching Materials for High School Physics, Harold S. Spielman, 229–233.

Report to the NARST on the Relationships with the American Association for the Advancement of Science, A, George Griesen Mallinson, 70–78.
Research Concerning the Nature of Children's Ideas in Relation to Scientific Phenomena, Katherine E. Hill, 261–268.
Research in Science Teaching, Fifth Annual Review of, Ellsworth S. Obourn, Lillian H. Darnell, George Davis, and Edward K. Weaver, 375–409.
Role of the Professional Science Educator in the Present Manpower Shortage, The, Ellsworth S. Obourn, 133–139.
Russia Can View with Satisfaction Our Dilemma in Technical Education, L. E. Grinter, 150–154.
Samuel Johnson and Experimentation, A. W. Meyer, 39–40.
Science and Mathematics Courses Offered in Certain High Schools of Louisiana, Rogers E. Randall, 202–203.
Science for Children Throughout the World, Willard J. Jacobson, 283–289.
Science Teaching in Negro High Schools of Louisiana, Rogers E. Randall, 65–68.
Scientific Manpower Problem in the Program at Teachers College, Columbia University, The, F. L. Fitzpatrick, 140–145.
Secondary School Science Program, The, James G. Harlow, 113–119.
Sifting Fact from Fiction in Space Travel, John Sternig, 301–304.
Social Science and Atomic Power, Melvin J. Williams, 126–132.
Some Data on Science Instruction in Iowa High Schools, J. W. Kercheval, 191–197.
Status of the Science Teaching Manpower in New York City, The, Samuel Schenberg, 119–125.
Study and Development of a Course for Tenth-Year Science in Vocational High School for Mechanical, Electrical, and Structural Trades, Eugene J. Erdos, 69–70.
Study of Science Programs in Twelve Iowa High Schools, A, Leonard Winier, 181–190.
Teaching Creatively, N. Eldred Bingham, 271–277.
Topical Analysis of High School Biology Textbooks, A, Sam S. Blanc, 205–209.
Trends in Science and Mathematics Credits at South Dakota State College, Clinton R. Wiseman, 203–205.
Turnover of High School Chemistry Teachers, Alabama, 1942–1953, Will S. DeLoach and Willa Boysworth, 200–201.
Waldo Willie Emerson Blanchet, Clarence M. Pruitt, 9–10.
What Is Relativity?, Edmond P. Odelscalchi, 213–216.
Where Are We in Elementary Science?, Paul E. Blackwood, 277–283.
Whole Truth and Nothing But the Truth Examinations, The, William Harrison Lucow, 99–103.
Why Is the Number of Science Students Not Increasing?, J. E. Hawkins, 160–167.
